

Phonak launches revolutionary new covert surveillance system

Highlights:

- New interference-free highly secure digital standard
- Loop-free operation
- High-performance microphone, even in noisy situations
- Ultra-discreet earpiece

MURTEN, SWITZERLAND, NOVEMBER 20, 2017

Phonak Communications, the world leader in audio transmission systems, is proud to announce the launch of **Roger Covert** – a revolutionary new system for security professionals.

For the first time, Roger Covert allows loop-free operation during surveillance operations, allowing operatives significantly more flexibility. And advanced microphone technologies mean operatives' transmissions can be heard even in noisy situations, or while whispering.

With its ergonomically designed, nearly invisible earpiece with 12-hour battery life, and a range of configuration options, Roger Covert gives security professionals a highly adaptable system to enhance their monitoring capabilities.

Roger Covert utilizes Phonak's revolutionary Roger technology, combined with 128-bit AES encryption, to deliver a system which offers interference-free, interception-proof audio transmission with the highest intelligibility, for the use of surveillance professionals.

"Security forces face ever-greater challenges in their work, and Roger Covert is designed to help them step up their game. By removing the need for an induction loop, Roger Covert allows operatives more freedom in clothing, more freedom of movement, and more comfort in difficult situations. Combining this with a highly sensitive microphone and high-quality audio transmission, we've created the most powerful, flexible and secure system available today," said Evert Dijkstra, CEO of Phonak Communications.

Phonak's bespoke Roger technology uses a combination of advanced audio processing, adaptive frequency hopping and other innovations to deliver high-quality, highly intelligible audio with highly-miniaturized components, allowing the use of extremely discreet audio receivers.

The Roger Covert range is now available worldwide. For more information, security professionals should contact their Phonak dealer, or visit www.phonak-roger-security.com

About Phonak Communications AG:

Since 1992 Phonak Communications has helped professionals to communicate effectively in challenging environments. Thanks to our working closely with end users to develop solutions that perfectly meet their needs, our miniaturized wireless earpieces, headsets and professional hearing protection devices are used and trusted by demanding customers around the world. Based in Murten, Switzerland, Phonak Communications is a member of Sonova Group, the world's leading hearing healthcare company.
